10/2/2014

Dear Resident:

During the next few weeks PSE&G (Gas) will be working to replace the gas mains and services in your area. PSE&G has hired us (South State Inc.) to complete this work. The work is being done in conjunction with the PSE&G Electric Underground Reinforcement Project. The gas work primarily involves the relocation of the gas main. However, in some cases your service may need to be replaced or relocated also. If so, you will be informed by the PSE&G inspector or our Foreman onsite.

We will make every effort not to disrupt trash collection or parking conditions, but may find it necessary to temporarily block your driveway. If blocking your driveway is required, you will be notified in advance. We regret any inconvenience this may create but hope that with your cooperation we will be able to complete the project quickly.

When all of the work has been completed (both Electric & Gas), and the ground has had adequate time to settle, the sidewalk and the roadway will be permanently replaced by the Electric DP&C restoration contractor.

Should you have any problems or questions concerning this work, please see the Public Service Inspector on site, or call our us at 856-498-8717. Should you have questions in regard Southern Reinforcement Project hotline at 1-866-507-5961 for details regarding the project.

Very truly yours,

Keith Kology
